58-60 Step back on to L. Foot, Hold R Foot out at 45 degrees R. for 2 beats.

BEGIN AGAIN IN THE OPPOSITE DIRECTION.

Choreographers Note: Towards the end of the music, the second last sequence, the music will slow down and stop for several seconds.

This is at the very end of the last sequence.

Hold the originally start position with the R. Foot out at 45 degree angle R. and then commence dancing again when the word "IN" is said when the artist starts singing again.

When you commence the dance again you will move slightly slower than the original beat until you hit

STEP #19 where you will once again pick up the original count.
It will take several practices of dancing to the music to get the correct phrasing of beat and music.
